

# GTG: Economic Strengthening, Livelihoods and Child Protection

## Vision:

To improve the design, quality and effectiveness of economic programming targeting conflict-affected populations as a means of enhancing the protection and well-being of affected children.

## Example of planned work:

Capture existing learning, establish and secure agreement on core impact indicators, and develop an evidence base on what works in regards to how economic programs can improve the well-being of children.

Agency Learning Network on the Care and Protection of Children in Crisis-Affected Countries

---

# Objectives

1. Capture existing learning on the economic programming and child protection nexus.
2. Identify additional learning needs within the sector to strengthen the link between economic programming and child protection.
3. Assess and document the gendered impacts of livelihood interventions and implications for child protection.
4. Serve as a conduit to share learning with the field and Program Learning Groups.

CPC Learning Network

Agency Learning Network on the Care and Protection of Children in Crisis-Affected Countries

5. Provide technical support to Program Learning Groups.
6. Develop criteria for identifying promising and proven practices within the economic programming sector.
7. Develop core indicators for child protection and household security for livelihood interventions.
8. Mobilize resources for the work of the Global Technical Group.

# Activities

- Use CYES platform as means of engaging key agencies in online discussions, capturing existing learning, documenting promising practices, etc.
- Share resources via CYES platform
- Develop mechanism(s) for providing technical support to Program Learning Groups
- Develop core indicators for impact measurement
